Re: Technology Department Update

OVERVIEW OF PAST MONTH:

- **Security:** We have been awarded up to a $20,000 grant, with a 5% matching cost, from the Utah Cyber Center to use towards enhancing our cybersecurity related to our SCADA and/or Automated Systems. This has led us down a path with the Cyber Center where we have learned what low cost or free options are available through them for general network security and cyber training. We will be implementing some of those services in the next few months, and continuing our work with ETS to keep the District networks and SCADA systems as secure as reasonably possible while still being usable by staff. We have a year to use those funds.

- **Asset Management:** We have made progress with the EAM and our Fleet assets. All vehicles have been added to our asset list. Casey has been backfilling vehicle service records for oil changes and repairs into the system and linking them with Docuware, our digital file repository. This past data has allowed us to start using the Preventative Maintenance (PM) portion of the EAM, predictively scheduling alerts before the vehicles reach the next oil change interval. We update the mileage weekly, using digital fuel logs obtained from the State fuel card website. This will help maintain the vehicles with proper service and not have to rely on the operators remembering to look at the stickers on the windshields or notifications on the dashes.

- **Annexations**: The Altus Station Annexation plat was approved by County Council and has been handed over to the County Recorder and Attorney to complete the process with the Lieutenant Governor.

  There have been a few additional annexation inquiries, an individual lot and home along Old Ranch Road and a commercial parcel adjacent to the Waldorf in the lower Canyons area, but no petitions have been filed yet.

- **SCADA**: We have been wrapping up little odds and ends around the District and planning to resurrect a small well at the top of Stagecoach (~10gpm) for next year's peak usage. It is also time for us to start winterizing sites and checking the heaters and temp settings as we work around the district.

- **Statistics:**
  Blue Stakes data:

Date	New	Update	Emergency
1/2026	135	28	10
2/2026	110	21	3
3/2026	245	23	2
4/2026	432	63	1
5/2026	409	81	13
6/2026	336	132	8
7/2026	330	106	15
8/2026	281	110	4
9/2026	286	89	7
10/2026	263	82	11
11/2026			
12/2026			
Year to date	2827	735	74
