

Mountain Regional Water Special Service District's

2025 Prequalified Firm List for Architect/Engineering/Geology Service Providers:

Per Section 3.5.6.6 of Mountain Regional Water's Procurement Policy (February 4th 2024, as amended), the District shall follow approved methods for entering into architect/engineering/geologist service contracts. The following classifications will be used as the first criteria for consultant selection. Where commonality exists, a rotation system shall be employed. In the event a specific task arises that does not fall into the classifications detailed below and a prequalified vendor is determined to have that specific expertise (supported by past experience), the Chief Procurement Officer shall make the selection accordingly and provide justification using the District's approved process.
