WINTERIZE YOUR IRRIGATION SYSTEM BY OCTOBER 31

1. Insulate your system:

- Shut off the water supply to the irrigation system.
- Protect your main shut off valve with insulation. (foam insulation tape and/or a plastic bag)
- Insulate above ground piping.

2. Drain the pipes:

- Remove the water from the pipes and sprinklers

3. Protect valves & backflow preventers:

- Insulate backflow preventers and valves if they are above ground.
- Be sure not to block the air vents and drain outlets on backflow preventers (see page 2).

DO I NEED TO DO ANYTHING TO MY BACKFLOW PREVENTION ASSEMBLY DURING THE WINTER SEASON?

Yes, you can take several steps to protect your backflow assembly during the winter. A backflow preventer that suffers from freeze damage may become unrepairable, leading to costly replacement or repairs.

The best way to prevent this is to consult your local irrigation contractor to professionally winterize your system. This process removes all water, which prevents the unit from freezing and expanding. Remember to re-install the backflow preventer each year, as it is essential for preventing irrigation chemicals from contaminating the water supply. A backflow cover is also designed to protect the equipment from vandals and the weather.

MOUNTAIN REGIONAL WATER SSD CELEBRATES 25 YEARS OF PROVIDING ESSENTIAL WATER SERVICES TO THE SNYDERVILLE BASIN COMMUNITY! THIS ANNIVERSARY PROVIDES AN OPPORTUNITY TO ACKNOWLEDGE THE HARD WORK AND DEDICATION OF THE MRWSSD TEAM, INCLUDING BRIAN, STACY, AND RICK, WHO ARE ALSO CELEBRATING THEIR 25TH ANNIVERSARIES WITH THE DISTRICT. WE ALSO RECOGNIZE THE CONTRIBUTIONS OF OUR CUSTOMERS AND CELEBRATE THE COLLECTIVE SUCCESS IN PROVIDING A VITAL RESOURCE TO THE COMMUNITY FOR THE PAST 25 YEARS.

IMPORTANT BACKFLOW REMINDER

Fire Suppression and Domestic Backflow inspections are due no later than November 15
